FREE-STANDING STUDY CARRELS

CATALOG NO. 1357-A

THE GLOBE-WERNICKE CO. • CINCINNATI 12, OHIO

Free-Standing Study Carrels

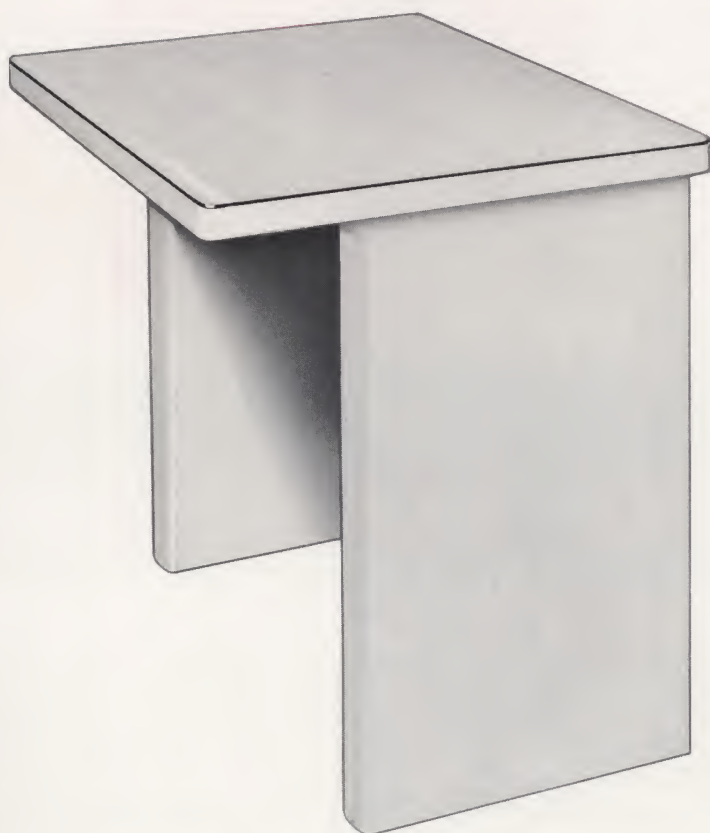

for private or semi-private study areas

Globe-Wernicke utilizes the latest engineering principles of modular design to produce the most flexible study carrel in the industry. A pioneer in the library field since it developed the first sectional bookcase in 1890, G/W is the originator of modular component techniques. Combining this long-time understanding of specialized library needs

with experience in industrial planning, Globe-Wernicke developed this exclusively functional equipment for you. Using standard components which are completely interchangeable, you adapt G/W study carrels to *your* individual needs. These "needs" may range from the simple basic unit shown here to a completely private, free-standing study enclosure built with interlocking partitions.

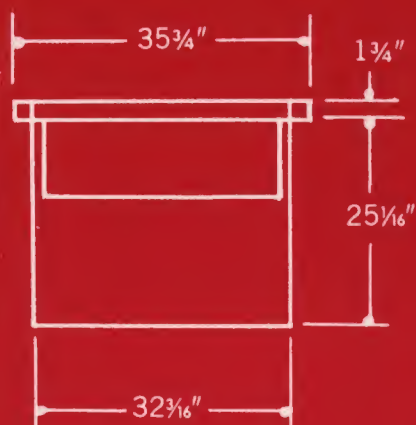

Carrels are simple and easy to install. If library conditions require changes, dis-assemble and re-arrange your versatile study carrels into new combinations without disturbing the area.

Capitalize on G/W's experience in solving your technical problems; there is a study carrel unit custom-designed for *your* library.

No. SC-1 . . . Study carrel for one person consists of basic components—a carrel top and two sturdy end supports.

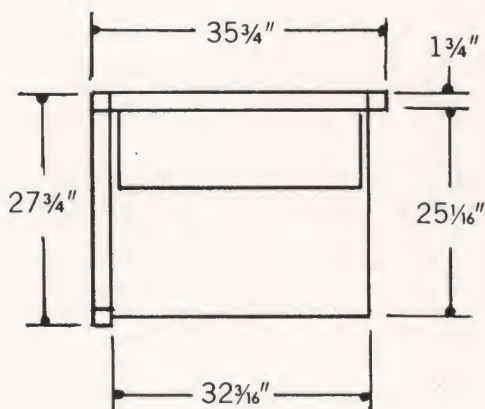

No. SC-1P . . . Study carrel with back partition. Consists of carrel top, two end supports, back partition with bookshelf, and two posts.

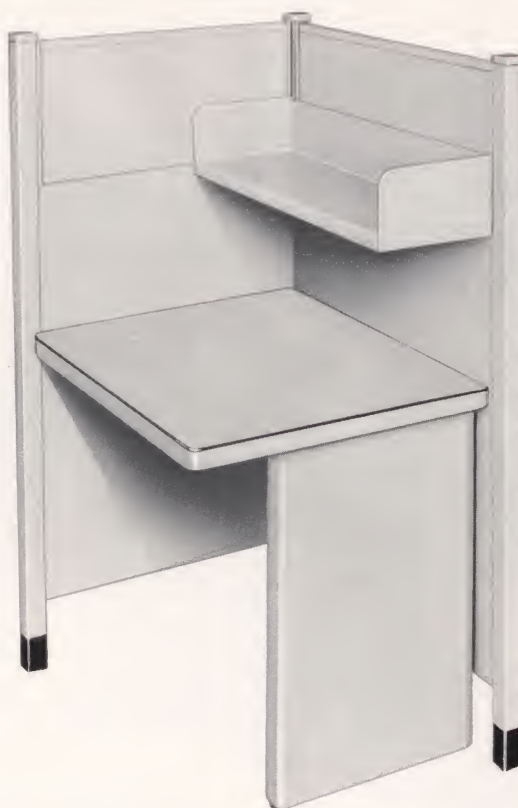

PLAN VIEW

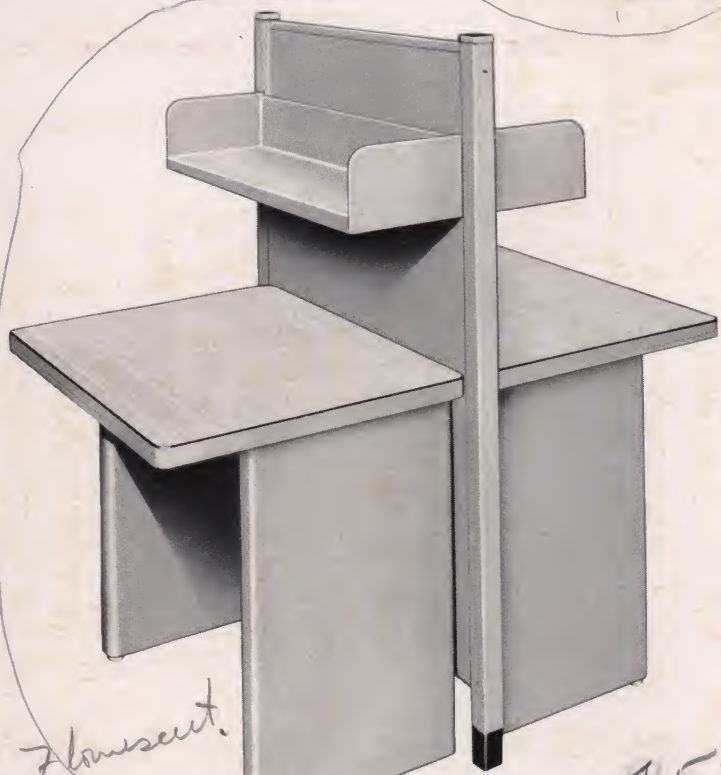

No. SC-1EP . . . Study carrel with back and side partition. Consists of carrel top, one end support, two divider partitions, bookshelf, and three posts.

Carrel Enclosure *for serious study*

● **No. SC-1C**...Give your students and faculty the privacy they need for concentrated work with Globe-Wernicke free-standing carrel enclosures. They provide a spacious work area in quiet, distraction-free surroundings.

Carrel enclosures are also ideal to create inexpensive, private offices for your library personnel. Fit these work areas with G/W storage or filing units as your individual needs dictate.

Though a complete office in itself, entire enclosure can be re-arranged or moved by your own personnel. Assemble it in these simple steps:

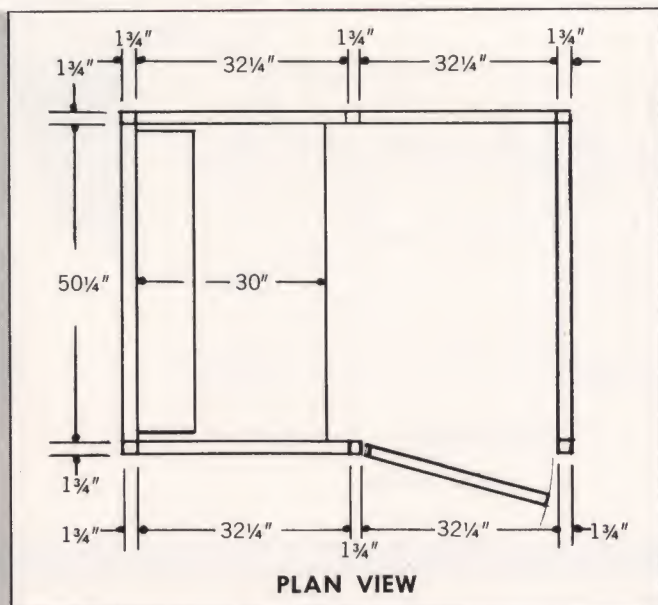

1. Attach partitions and carrel tops to posts.
2. Insert glass panels into channels and attach to posts.
3. Mount door on hinges.

Doors, which are equipped with locks, are constructed with internal soundproofing.

Carrel enclosure shown here was constructed with the following components:

- Five 66 $\frac{3}{4}$ -inch high partitions with glass panels.
- Six partition posts
- Hinged door
- 30" x 50" carrel top
- Full-length bookshelf

SOME BASIC FACTS

STANDARD CARREL TOPS are 32¼" wide and 25" deep. They are covered with long-life linoleum. Laminated plastic is also available at a slight additional charge.

Standard Linoleum Colors

No. 426 Gray

No. 416 Green Mist

No. 415 Blond Tan

Standard Laminated Plastic Colors

No. TX-3601 Gray Desktone

No. TX-3605 Green Desktone

No. TX-3609 Tan Desktone

All carrel tops can be equipped with a center drawer at a slight additional charge.

PARTITION PANELS are available in four heights: 42¾"; 54¾"; 66¾"; and 84¾". Catalog illustrations show 54¾"-inch partitions unless otherwise marked. Panels have 5½"-inch open base.

SNAP-IN BASE PANELS can be used to convert to closed-base partitions according to varying considerations of ventilation, privacy, and individual taste.

TOP PARTITION PANELS are available in steel, acoustical, or glass (clear or Linex).

WIRING . . . All partition panels and posts have provisions for concealed wiring. Users may have electrical outlets and switches for supplementary lighting or electrical equipment installed as needed.

BOOKSHELVES are 9½" deep and full-partition width. One shelf may be used with 54¾"-inch partitions. Two shelves may be attached on 66¾"-inch partitions.

STANDARD FINISH COLOR is two-tone gray . . . No. 49 Seal Gray for end supports and edges of tops; No. 52 Pearl Gray for partition panels and shelves.

Single-tone units are available in No. 60 Sea Green and No. 90 Copper Tan at no additional cost but subject to slight delivery delay. Special colors are available on request.

TO ORDER

- Standard study carrels have linoleum tops and are furnished with 54¾"-inch steel partitions without base panels.

In ordering study carrels, designate any deviation from standard unit. Specify color, top covering, partition height, material of partition top panels, and whether base panels are desired.

VARIATIONS OF STUDY CARRELS

No. ST-1 . . . Table-type study carrels are available with 24" x 36" tops. Ideal where carrels are placed in series. Privacy screen is furnished with eight-inch returns.

No. ST-1A . . . Use of privacy screen with full-depth return on side offers more seclusion to study area. Screen is fitted with conveniently placed 36-inch bookshelf.

LIGHTING FIXTURES

No. FLU-33 . . . Supplement overhead or natural lighting with fluorescent lamps which attach underneath bookshelves. They are at the proper height for practical working comfort.
